

AI READINESS AND GOVERNANCE WORKSHOP

Turn interest into action! This structured, interactive workshop helps your team adopt AI securely, responsibly, and with confidence.

Artificial intelligence is rapidly entering the enterprise, often faster than governance, risk, and security teams can keep up. Avertium's AI Readiness and Governance Workshop is a facilitated, multi-session engagement designed to help organizations move from AI interest and experimentation to a clear, defensible plan for secure and responsible AI adoption.

This workshop is a structured, outcome-focused engagement that educates you about AI risk and safe use and produces an execution-ready plan. It combines guided discovery, risk analysis, governance alignment, and executive level decision support to ensure AI initiatives are aligned with business goals, regulatory obligations, and your organization's risk tolerance.

WHAT'S BLOCKING YOUR AI PROGRESS (AND HOW WE FIX IT)

The workshop solves common challenges with collaborative mitigation:

"WE DON'T KNOW WHERE TO START."

The structured sequence turns ideas into prioritized, real-world use cases, moving you from idea to plan.

"WE'RE WORRIED ABOUT RISK, BUT WE CAN'T QUANTIFY OR EXPLAIN IT."

The workshop identifies key risks by tool + use case and produces a clear picture with tailored mitigations + controls.

"LEADERSHIP WON'T FUND THIS WITHOUT A BUSINESS CASE."

The workshop supports cost justification using an ROI calculator approach, especially for enterprise-grade tools.

"WE'RE STUCK DEBATING TOOLS INSTEAD OF MAKING DECISIONS."

The facilitated evaluation and documented outputs help drive decisions and reduce redundant effort.

"WE DON'T HAVE TIME. THIS WILL DRAG ON."

The homework/session cadence keeps momentum and completes each workbook section efficiently.

AI READINESS AND GOVERNANCE RISKS THE WORKSHOP SOLVES

Key security risks this workshop is intended to surface:

- Data leakage and confidentiality exposure
- Inappropriate tool selection for the use case (risk mismatch)
- Poor output quality and hallucinations leading to bad decisions
- Compliance, regulatory, and contractual violations
- IP and proprietary content risk (inputs & outputs)
- Access controls and overexposure of internal data through AI experiences
- Lack of user adoption or inconsistent usage
- Unclear ROI and cost justification for enterprise-grade tools

WORKSHOP ACTIVITIES

- **Use-case discovery & prioritization:** Brainstorm, score, and select applicable use cases in order of importance.
- **Data mapping:** Identify sensitive data, its location, and who is responsible for it.
- **Tool + use-case fit matrix:** Compare options against requirements & cost.
- **Risk walkthrough (tool + use case):** Rate risks and document assumptions.
- **Mitigation design:** Map risks to controls and owners.
- **Prompting & guardrails:** Avoid manipulation, jailbreaks, and misuse.
- **ROI calculator session:** Estimate savings, set baselines, and model benefits.
- **Execution-ready roadmap:** Build a 30/60/90-day plan with milestones and dependencies.

AI WORKSHOP METHODOLOGY

We complete your workbook in four collaborative steps, guiding you with security and compliance expertise along the way:

STEP 1

Plan the engagement

Confirm workbook themes, attendees, and schedule ~5-6 sessions (typically 1-2 hours each).

STEP 2

Complete pre-work

Gather the information and documentation needed for the next session.

STEP 3

Participate in the session

Work through inputs, capture decisions/assumptions, and complete the workbook section with guided expertise.

STEP 4

Identify risk and ROI

Document risk/mitigations and finalize justification using the ROI calculator.

WORKBOOK DELIVERABLES

You'll leave the workshop with a completed AI readiness and governance workbook that turns "AI interest" into a clear, defensible plan:

- ✓ Discovery/scoping outputs
- ✓ AI tools evaluation and shortlist
- ✓ Risk register & mitigation recommendations
- ✓ ROI/cost justification artifact
- ✓ 30/60/90-day roadmap

ABOUT AVERTIUM

Avertium is an AI security and compliance leader, delivering comprehensive solution to mid-market and enterprise customers. Our unique "Assess, Design, Protect" approach addresses and improves security strategy, reduces attack surface risk, strengthens compliance, and provides continuous threat protection.

Avertium maximizes customer security investments and enables customers to focus on growth, innovation, and business outcomes, while assuring that their security infrastructure is resilient and adaptive to evolving threats. **That's why customers trust Avertium to deliver better security, improved compliance, and greater ROI.**
