CMMC READINESS SERVICES
ASSESSMENT, REMEDIATION, & CONSULTING

A SMARTER PATH TO CMMC READINESS

Department of Defense contractors and subcontractors must comply with the Cybersecurity Maturity Model Certification (CMMC) and demonstrate compliance through a third-party audit. The CMMC framework uses comprehensive assessments and scalable certifications to validate cybersecurity maturity while setting a high standard for protecting sensitive data.

With such an important task at hand, selecting the right partner to entrust your CMMC readiness to can be daunting.

Avertium's compliance experts take a comprehensive, business-aligned approach to CMMC readiness, accurately scoping and assessing your infrastructure across all categories and your maturity level. No matter where you are on your CMMC journey, we join you there and ready your organization for CMMC certification:

- For those getting started, Avertium's CMMC Readiness Assessment provides a clear, objective snapshot of your current cybersecurity posture against CMMC requirements.
- To unburden your team, our CMMC Remediation Assistance applies compliance and cybersecurity expertise to help you deliberately and systematically close identified CMMC gaps.
- CMMC Compliance Consulting provides control-by-control guidance to complete a detailed matrix for creating your System Security Plan (SSP) and Plan of Actions and Milestones (POAM).

Your tailored path leads not only to compliance but also to a program that improves security and fits the way you do business.

CMMC READINESS ASSESSMENT

Avertium's CMMC consultants replace uncertainty with clarity, delivering a clear assessment and prioritized plan, guiding you to faster and stronger compliance. By examining your systems, architecture, processes, and procedures, we provide a clear, actionable view of where you stand and what it will take to achieve compliance with confidence:

- ✅ **Assess:** Evaluate your current security controls, operational practices, and overall cybersecurity posture.
- ✅ **Navigate:** Determine the most efficient business-specific path to meeting key certification requirements.
- ✅ **Identify:** Discover compliance gaps and opportunities for process alignment.
- ✅ **Strategize:** Define a targeted approach to limit control scope and minimize business impact.

ASSESSMENT DELIVERABLES

The readiness assessment culminates in a report that is actionable, tailored, and results-driven:

> » **Executive summary** to communicate findings and their implications to company decision makers in support of your security efforts.
>
> » **Detailed findings** from evidence review, documentation analysis, and interviews to help you interpret requirements within your unique environment.
>
> » **Prioritized remediation recommendations** to address compliance and security gaps, helping you to ready yourself for certification and build long-term cybersecurity resilience.

REMEDIATION ASSISTANCE

Avertium bolsters your CMMC certification preparation with expertise and resources to deliberately and systematically remediate findings identified in the POA&M, operationalize controls, and help sustain compliance long after the audit is over. As a full-service cybersecurity and compliance firm, we unburden your team through the following assistance:

- Review or write policies and procedures
- Provide technical and operational fixes
- Conduct vulnerability management and penetration testing

Most firms can tell you what's wrong - Avertium is built to help you fix it. This contributes to a more resilient security program beyond audit readiness.

CMMC COMPLIANCE CONSULTING

CMMC Consulting Services is a hands-on engagement that helps organizations implement CMMC requirements with confidence. Our consultants work side by side with your team to walk through each applicable control, define how it should be implemented in your environment, and recommend solutions where gaps exist.

Our collaborative, educational approach empowers your team and delivers a completed controls matrix to act as a single source of truth, translating abstract compliance requirements into a concrete, auditable, and actionable picture of how your organization meets CMMC requirements. The matrix gives you all you need to create two critical CMMC documents - the System Security Plan (SSP) and Plan of Actions and Milestones (POAM) – to prepare your organization for engaging a CMMC Third-Party Assessment Organization (C3PAO).

ABOUT AVERTIUM

Avertium is an AI security and compliance leader, delivering solutions to mid-market and enterprise customers. Our unique "Assess, Design, Protect" approach addresses and improves security strategy, reduces attack surface risk, strengthens compliance, and provides continuous threat protection. Avertium maximizes customer security investments and enables customers to focus on growth, innovation, and business outcomes, while assuring that their security infrastructure is resilient and adaptive to evolving threats. That's why customers trust Avertium to deliver better security, improved compliance, and greater ROI.
