

READ ME FIRST

Microsoft has built one of the most comprehensive business and security platforms on the market. Yet most organizations don't realize how much more their existing Microsoft 365 licenses have to offer for security and compliance.

Discover how Avertium helps you extend those tools to meet your security and compliance needs, optimize your investment, and consolidate your environment.

45

Average tools per organization

ORGANIZATIONS USE AN AVERAGE OF 45 CYBERSECURITY TOOLS TO MAINTAIN THEIR SECURITY POSTURE¹

124%

Projected return on investment

THE PROJECTED ROI FROM CONSOLIDATING ON THE MICROSOFT SECURITY PLATFORM²

WHERE AVERTIUM CAN SUPPORT

Assess risk, design secure and compliant Microsoft configurations, and continuously protect your environment with 24/7 MXDR, governance support, control validation, and audit-ready reporting.

Avertium operationalizes your Microsoft investments across:

- Microsoft Defender XDR
- Microsoft Sentinel
- Microsoft Entra Suite
- Active Directory
- Microsoft Purview
- Microsoft Intune
- Microsoft Defender for Cloud
- Microsoft Security Copilot

OPERATIONALIZE SECURITY AND COMPLIANCE THROUGH YOUR MICROSOFT INVESTMENTS

TOOLS ALONE DON'T EQUAL COMPLIANCE. PROVING COMPLIANCE DOESN'T MEAN YOU'RE SECURE.

Security and compliance work best when they work together. Turn your existing Microsoft business and security investments into tailored, defensible, and continuously improving security and compliance programs with Avertium's proven Assess, Design, Protect approach.

COMPLIANCE ALONE

The Challenge

Point-in-Time

Periodic audits and scheduled assessments

Checklist-Driven

Meets requirements without validating impact

Static Controls

Implemented but never proven against threats

Audit-Driven Stress

Evidence collected under pressure, reactively

Compliant on paper. Still exposed in practice.

ASSESS • DESIGN • PROTECT

BRIDGES THE GAP

ASSESS | Establish a baseline

Assess your Microsoft environment to identify security posture, exposure, and compliance maturity. Note the gaps.

DESIGN | Architect the fix

Map compliance frameworks to Microsoft capabilities, optimize tool configurations, and maximize existing investments.

PROTECT | Operate continuously

Monitor, respond, and continuously improve by operationalizing Microsoft capabilities at scale.

OUTCOME | Programmatic security and compliance

Stay audit-ready, reduce risk, and get more value from the tools you already own.

FUSION MXDR

Continuous Managed Security

Continuously Monitored

Continuous detection and response, not periodic assessments

Validated Controls

Tested and validated against real threats

Threat-Informed

Real threats, real context, real risk reduction

Audit-Ready by Design

Evidence generated continuously, not after the fact

Compliant and secure. Confidently protected.

WHERE CAN YOU MAKE THE **MOST IMPACTFUL CHANGE?**

By assessing risk, designing secure configurations, and continuously monitoring and responding, Avertium extends Microsoft capabilities to help you achieve and maintain security and compliance.

01

UNIFY SECURITY AND COMPLIANCE

No more silos. No more scrambling.

Unify risk reduction, regulatory controls, and 24/7 response — so incidents, evidence collection, and reporting are handled through audit-ready workflows (not siloed teams and one-off spreadsheets).

02

MAXIMIZE YOUR MICROSOFT INVESTMENTS

Get more from what you already own.

Activate, configure, and extend the tools in your portfolio to reduce tool sprawl, eliminate redundant spend, and get more value from your Microsoft ecosystem.

03

ACHIEVE CONTINUOUS COMPLIANCE

Map frameworks to controls.

Translate regulatory requirements into secure, operationalized Microsoft controls tailored to evolving framework requirements for PCI, HIPAA, HITRUST, SOC 2, ISO 27001, NIST, CMMC, and more.

04

SECURE AI AND CLOUD ADOPTION

Innovate at scale without adding risk.

Confidently adopt cloud and AI securely and at scale by protecting sensitive data, aligning AI governance to NIST AI RMF and emerging standards, and enabling safe innovation.

05

STRENGTHEN YOUR SECURITY POSTURE

Ensure continuous monitoring and response.

Increase protection with a single partner that combines compliance expertise and 24/7 Microsoft-native MXDR services to continuously manage risk and support regulatory requirements.

OUTCOMES

Confident adoption of AI and emerging technologies that safely accelerates innovation.

Reduced regulatory compliance risk through validated controls and continuous programs.

Stronger security posture aligned to regulatory obligations and business objectives.

Efficiency gained from faster audit readiness using Microsoft-native tools.
