## AVERTIUM ADVANTAGE

The rigorous **Avertium Engagement Methodology** ensures each new AlienVault customer benefits from the best practices developed working with the existing install base. Avertium combines a strategic approach to XDR using a proprietary playbook and industry-leading NIST CSF with a tactical approach using the MITRE ATT&CK framework to assess your security program's maturity, assign a score and develop corresponding action steps prioritized to your objectives, risk threshold and resources.

## MORE RIGOR

- Maximized utilization to take full advantage of your AlienVault investment
- Strategic approach to drive customer's roadmap by analyzing security posture, then working together toward target state
- Full visibility across environment with data integration from high value datasources

## MORE RELEVANCE

- Correlation rules customized to your environment
- Detect full spectrum of threats through proprietary use cases and escalation techniques
- Tactical and CISO/C-level reporting
- Use of proprietary tool ensures more efficient alarm handling

## MORE RESPONSIVENESS

- Analysts with comprehensive visibility to manage alarms from all instances
- Structured on-boarding delivers faster time to return on investment (ROI)
- Expert threat hunters uncover hidden threats
- Progress tracking with regular drilldown following NIST CSF structure

## THE AVERTIUM MANAGED SECURITY SOLUTION SUITE

The award-winning **Avertium** managed security solution combines best-in-class technologies managed by Avertium's certified CyberOps team for 24/7/365 monitoring, detection and response. The turnkey service encapsulates XDR capabilities and provides coverage across your networks, servers, email, endpoints, and cloud environments to provide visibility and context in the identification and handling of cyber threats wherever your data may flow. Complementary managed security services include ZTN-as-a-Service, VM-as-a-Service and multi-factor authentication.

Our proprietary security operations orchestration and workflow platform, OmniQueue, ensures more responsiveness and more relevance in our CyberOps Centers of Excellence consistently delivering a **400,000 to 1** event to alert ratio.
