# HITRUST CERTIFICATION SERVICES

COMPLIANCE EXPLAINED. CERTIFICATION SIMPLIFIED

Healthcare organizations require their vendors to be HITRUST certified, and for many this rigorous exercise is a time-consuming and labor-intensive undertaking.

Avertium's goal is to bring insight and familiarity to transform the HITRUST certification process into a productive one for your organization to manage security requirements from federal and state agencies and other third parties.

We are a HITRUST Assessor firm with a team of authorized Certified CSF practitioners poised to augment your staff's efforts, share the workload and ensure accuracy.

1 **SELECT**
Help you choose and purchase the HITRUST portal subscription

2 **SCOPE**

HITRUST SOLVES FOR

- Inconsistent implementation of minimum controls

- Inefficiencies resulting from different interpretations of control objectives and safeguards

- Increasing scrutiny from regulators, auditors, underwriters, customers and business partners

- Growing risk and liability regarding the threat landscape and regulatory violations

- Security gaps in special purpose devices and applications

- Rapidly changing business, technology and regulatory environment

BUSINESS VALUE

- Provide insight into what you can expect throughout the HITRUST validation and certification process.

- Incorporate existing recognized security and compliance frameworks such as HIPAA, NIST, SOC 2, ISO and PCI.

- Assess whether your controls program is meeting requirements and help you provide a clear and actionable plan to fulfill them.

- Simplify your experience, freeing your staff to concentrate on their jobs
