

PCI COMPLIANCE SERVICES

COMPLIANCE WITHOUT COMPLEXITY

If your business processes, stores or transmits cardholder data, keeping customer data safe is not just subject to regulatory compliance, it's good business.

At Avertium we believe that achieving Payment Card Industry Data Security Standard (PCI DSS) compliance ought to be business as usual. Our experienced Qualified Security Assessors (QSAs) work alongside customers to develop and implement year-round business processes, policies and procedures as required by the PCI DSS. The end result: A more methodical approach toward an “always compliant” state while maintaining end-customer confidence.

“ EVERY CUSTOMER WE DEAL WITH REQUIRES US TO MEET THEIR LEVEL OF SECURITY AND EVERY STANDARD THEY MEET. AVERTIUM’S CONSULTATIVE APPROACH TO OUR PROBLEMS WAS MUCH MORE EFFECTIVE THAN THE COOKIE CUTTER APPROACH THAT OTHER FIRMS PRESENTED TO US. WE ENDED UP WITH A BETTER SOLUTION AT A LOWER COST. ”

Larry Slavick, Director, Information Technology, Guy Brown

THE AVERTIUM ADVANTAGE

Avertium helps carry the load by providing expert QSAs, security engineers, technical writers and more to provide world class, competitively priced PCI compliance services.

MORE RIGOR

Decades of combined experience to guide you through every facet of PCI DSS compliance when you require more than check-the-box.

MORE RELEVANCE

Customer-first consultative approach, helping you to understand and comply with the PCI requirements appropriate for your business.

MORE RESPONSIVENESS

Comprehensive suite of PCI-related services under one roof to streamline your compliance process:

- > Managed Security Services
- > Network Vulnerability Scanning
- > Vulnerability Management as a Service
- > Policy and Procedure Development
- > Sensitive Data Discovery
- > Risk Assessment

PENETRATION TESTING

Fulfill PCI DSS cardholder data environment (CDE) penetration testing requirements with rigor and get detailed reporting for remediation:

- **Internal Penetration Test** of CDE and critical systems inside the perimeter
- **External Penetration Test** of CDE and critical systems connected or accessible to public network infrastructure
- **Network Segmentation Test** of out-of-scope systems' ability to communicate with the CDE and other impacts to CDE security

PCI COMPLIANCE AS A SERVICE

Achieve year-round compliance and avoid the disruption of assessment with Avertium's subscription-based PCI Compliance as a Service:

- Lower overall cost of assessment
- Reduce likelihood of non-compliance
- Increase visibility of controls' effectiveness
- Alleviate stress of yearly preparation and execution

ABOUT AVERTIUM

Avertium brings enterprise-level security to mid-sized and larger organizations challenged by the cybersecurity talent shortage, rapidly evolving threat landscape and budgetary constraints. The company's acclaimed show-no-weakness approach to extended detection and response (XDR), governance and compliance, and strategic advisory services is redefining the managed security services category. From financial services and manufacturing, to technology and healthcare, more than 2,500 companies rely on Avertium's more rigorous, more relevant, and more responsive delivery of cybersecurity services. Backed by growth equity firm Sunstone Partners, Avertium operates CyberOps Centers of Excellence in Arizona, Colorado, and Tennessee. **Avertium. Show No Weakness.®**
